

## **CORONAVIRUS (COVID-19)**

### **Update - Pleasant View Outbreak**

**March 30, 2020**

Dear Valued Team Member,

As you know, a Skilled Nursing Facility in Mount Airy, Maryland experienced a COVID-19 outbreak over the weekend.

I wanted to follow up and let you know of the immediate action we took to assure the safety of team members and residents:

- As soon as we learned about the situation at Pleasant View on Saturday night, we sent a text message to both CLV and LVMG team members asking them to self-report if they are also employed at Pleasant View.
- We contacted the staffing resources/agencies we utilize to identify any staff that has worked at Pleasant View.
- We contacted Vendors that we share with Pleasant View.
- We have been in continuous communication with local and national PPE suppliers to develop ample levels of PPE.
- We strengthened our screening requirements. Now, all vendors and medically essential visitors must apply their own face masks in order to pass through screening.

Thank You for all you are doing! Please – take care and stay well!

Thank you,
